

BornAgain - Feature #1051

Feature # 964 (Rejected): === GUI ===

Implement warning sign widget in real time view

23 Apr 2015 11:12 - pospelov

Status:	Archived	Start date:	23 Apr 2015
Priority:	Normal	Due date:	
Assignee:	pospelov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Sprint 27		
Description			
For the moment we have there "Houston, we have a problem button" which appears in RealTime parameter tree if some parameters cause simulation failure. This button is not that fancy. It has to be replaced with our standard Warning sign widget (which was invented for python editor and which has much fancier look and feel).
