

BornAgain - Refactoring #1331

Feature # 1290 (Rejected): === Core: framework ===

regenerate Python bindings after moving declaration of `cvector_t`, `kvector_t` out of `Types.h`.

Description			
<p>Currently, <code>Types.h</code> declares quite different things. It can be split quite naturally into <code>Tools/Types.h</code> with declaration of 1- and 2-dimensional arrays, a new file <code>Geometry/Vectors3D.h</code> with declarations of <code>cvector_t</code>, <code>kvector_t</code>. It seems that nowhere both of them are needed, they are perfectly orthogonal.</p> <p>This split has already been carried out in branch 'Vectors3D', but I cannot regenerate the Python bindings</p>
