

BornAgain - Bug #1404

compilation broken for libgsl2

12 Apr 2016 13:35 - wuttke

Status: Archived	Start date: 18 Apr 2016
Priority: Urgent	Due date:
Assignee: pospelov	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: Sprint 31	
Description GSL API change affects ROOT minimizer, see https://sft.its.cern.ch/jira/browse/ROOT-7776 . We need to patch our clone, possibly with different library calls for different GSL versions	
Subtasks: Bug # 1411: FindGSL version test fails under cmake-3.0 => BornAgain does not build on D... Rejected	

History

#1 - 12 Apr 2016 13:46 - wuttke

Per 79fb089, cmake requires GSL 1 EXACT. Revert this once GSL 2 works.

#2 - 21 Apr 2016 18:26 - pospelov

- Status changed from Sprint to Resolved

I have updated minimizers and removed check for GSL version. It compiles with 1.16 and 2.1 without any additional cmake magic.

#3 - 04 Jul 2016 11:23 - herck

- Status changed from Resolved to Archived
