

BornAgain - Bug #1552

Feature # 1287 (Rejected): == Particle form factors ==

FormFactorTrivial should have RadialExtension = 0

01 Aug 2016 14:30 - wuttke

Target version:			

Description

The physical meaning of FormFactorTrivial is: form factor of a dot.
Accordingly, getRadialExtension() should return 0.
The current return value of 1 [nm] is completely arbitrary.
