

## BornAgain - Refactoring #1557

Feature # 284 (Rejected): === Fit ===

### FitParameterLinked causes weird coupling

<b>Description</b>			
FitParameterLinked inherits from FitParameter. However, its member m_pool_parameters is of type vector<RealParameter*>. So FitParameterLinked sits somewhere in between Fit/ (with class FitParameter) and Core/ (with class RealParameter). Can it be entirely moved to the one or the other side?
