Target version:			

Description

When trying the command from the Download documentation it is not possible to clone the git repository:

```
$ git clone git://apps.jcns.fz-juelich.de/BornAgain.git
```

Klone nach 'BornAgain' ...

fatal: Could not read from remote repository.

Please make sure you have the correct access rights
and the repository exists.

History

#1 - 08 Nov 2016 09:51 - pospelov

We have migrated to GitHub and will make an announcement in the next days,
meanwhile, please use

<https://github.com/scgmlz/BornAgain>

#2 - 16 Nov 2016 12:27 - wuttke

- Status changed from New to Resolved

Web docs now clearly refer to the new repository location. Hopefully this solves the issue.
