Target version:			
Description			
Might be an intermediate solution on the way to crash handling.			
<ul style="list-style-type: none">• We already know how to compile under Windows in RelWithDebugInfo mode.• And we have know that BornAgain GUI compiled with RelWithDebugInfo produces on Windows minidump files on crash.• These minidumps we are already able to debug in Visual Studio.			
Within this item, modify CMake machinery to generate Windows installer from binaries compiled in RelWithDebugInfo mode.			

History

#1 - 02 Dec 2016 19:29 - wuttke

- Parent task set to #1361

#2 - 18 Sep 2020 19:25 - wuttke

- Subject changed from Provide Windows installer with debug info in it to Installer: Windows: Provide alternative installer with debug symbols

- Status changed from New to Backlog
