Description			
<p>In core FormFactorTruncatedSphere got recently additional parameter in constructor. It allows to define spheres truncated from both top and bottom.</p> <ul style="list-style-type: none">• Implement the same in GUI• Think of better parametrization in Core. <p>Current one FormFactorTruncatedSphere(double radius, double height, double dh=0.0) to my opinion is confusing.</p> <ul style="list-style-type: none">• Update user manual.• Same for FormFactorTruncatedSpheroid
