

BornAgain - Bug #2007

GUI->Instrument view-> entering floating point numbers

09 Mar 2018 14:30 - ganeva

Status:	Resolved	Start date:	09 Mar 2018
Priority:	Normal	Due date:	
Assignee:	herck	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
<p>Entering of the floating point numbers is very inconvenient. It is impossible now to enter a number 1.2345 at once, since all the decimal places are automatically filled with zeroes. Now the entering of the floating point number can be done only in several steps:</p> <ul style="list-style-type: none">- enter 1- GUI automatically makes it 1.0000- delete zeroes, enter 2- GUI automatically makes it 1.2000 and ignores all the other digits you enter- delete zeroes, enter 3- GUI automatically makes it 1.2300 and ignores all the other digits you enter <p>and so on</p> <p>OS: Mac os X</p>
