Target version:	Sprint 37		
Description			
Reported by windows10 user. I was not able to reproduce it on linux.			
To reproduce:			
1. choose one of the predefined samples, run simulation			
2. go to projection screen, create some projection			
3. click on the 'floppy disk' icon on the right panel to save projection to a file			
the file will look like:			
<pre># Projections along x-axis (horizontal projections) # x y=0.0585 -0.02238285987812.063046e-04 -0.02220726751252.424241e-04 -0.02203167514681.806338e-04 -0.02185608278112.461915e-04 -0.02168049041541.462512e-04 -0.02150489804972.079338e-04</pre>
