Python utils: enhance functionality for reflectometry plotting

03 Jun 2018 23:57 - dmitry

Status:	Backlog	Start date:	03 Jun 2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
All the utilities are defined in plot_utils.py			
1. plot_specular_simulation_result should be able to handle several simulation results at once			
2. PlotterSpecular should be able to handle multiple fitting case.			
3. Axes' titles should comply in PlotterSpecular and plot_specular_simulation_result			

History

#1 - 13 Jun 2018 13:13 - pospelov

- Status changed from Sprint to Backlog
- Target version deleted (Sprint 38)

#2 - 18 Sep 2020 19:52 - wuttke

- Subject changed from Expand functionality of python-side plotting utils for reflectometry to Python utils: enhance functionality for reflectometry plotting
