

BornAgain - Bug #2189

Real time view shows alien tree on jobitem delete

05 Oct 2018 15:08 - pospelov

Status:	Resolved	Start date:	05 Oct 2018
Priority:	Normal	Due date:	
Assignee:	dmitry	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Sprint 39		

Description

- Create standard simulation
- Run it several times to have job1, job2, job3, job4, job5 ... in JobView
- Select first 3 jobs with shift key and remove them from the list
- Right at this moment RealTimeView will show JobModel tree opened on root item

I.e. no parameter tuning tree, just remaining job4, job5 in a list

Looks like RealTimeWidget gets invalid index and tries to show whole JobModel starting from root item.
