

BornAgain - Feature #2359

Envelope task # 2357 (Sprint): Reflectometry units should be angstroms.

Plot x-axis units in Angstroms for Reflectometry

14 May 2019 12:08 - juan

Status:	New	Start date:	14 May 2019
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
BornAgain uses nm as default units. The reflectometry community uses Angstroms and their data-files are written in angstroms. Thus, angstroms should be kept when plotting reflectometry data.			

History

#1 - 20 May 2019 10:08 - juan

- Tracker changed from Envelope task to Feature
