

BornAgain - Feature #2372

Core: import 2D SANS data

28 May 2019 18:25 - juan

Status:	Backlog	Start date:	28 May 2019
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
There is the need to read a new kind of data file containing 2d SANS data. The precise format of such a data file is yet unknown, but it might be a 4-column ASCII with each column holding the values of x-coord, y-coord, Intensity, dIntensity.			
This issue will be updated as soon as more details are known.			

History

#1 - 28 May 2019 18:30 - herck

- File KWS1.DAT added
- Status changed from New to Sprint

I put a typical reduced data file in attachment here. Please check if other instruments or data reduction procedures produce similar or different ascii data.

#2 - 30 Jul 2019 16:30 - pospelov

- Status changed from Sprint to Backlog

#3 - 30 Jul 2019 16:30 - pospelov

- Target version deleted (Sprint 41)

#4 - 18 Sep 2020 22:53 - wuttke

- Subject changed from New reading strategy for 2d data to Core: import 2D SANS data
