

BornAgain - Refactoring #2391

Code organization: Move builder classes out of Core or to dedicated namespace

31 Jul 2019 12:13 - wuttke

Status:	Resolved	Start date:	31 Jul 2019
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Examples that demonstrate how to use Core should not be part of Core.			
Could we move Core/StandardSamples out of Core?			
Or at least, could we move all Builder classes to a dedicated namespace?			

History

#1 - 18 Sep 2020 19:11 - wuttke

- Subject changed from Move builder classes out of Core or to dedicated namespace to Code organization: Move builder classes out of Core or to dedicated namespace
- Status changed from New to Backlog
- Priority changed from Normal to Low

#2 - 23 Nov 2020 17:17 - wuttke

- Status changed from Backlog to Sprint

#3 - 23 Nov 2020 17:17 - wuttke

- Status changed from Sprint to Resolved

good enough; code is in dedicated subdirectories
