Description

This is tedious and massive directory renaming, to get at the end Documentation menu entries right:

To Discuss exact naming

- Title "Working with Python scripts" -> "Tutorials".
url's from "working-with-python/" -> "tutorials"
- Title "Tutorials" -> "Examples".
url's from "tutorial-examples/" -> "examples"

The problem is that url's appears everywhere in markdown cross-references and itis tedious work to rename.
