Description

This is the parent of all tasks related to IntensityData.

Efforts should be coordinated with raw-data reduction software currently developed by Alexander Weber's team.

Subtasks:

Feature # 169: Implement OutputData mask to have union of two masked areas	Rejected
Feature # 136: Add resizing of OutputData with new bin values taken from interpolation ...	Rejected
Testing # 128: Add OutputData Unit tests	Rejected
Testing # 127: Add LLData Unit tests	Archived
Feature # 437: Provide OutputData with ExportToNumpy function for PythonAPI	Archived
Feature # 588: Extend OutputData with data structure responsible for masking and weight...	Rejected
Refactoring # 619: Masked simulation doesn't use all threads all the time	Archived
Refactoring # 947: Refactor DWBASimulation family	Rejected
Feature # 922: Add slicing to IntensityDataFunctions	Archived
Feature # 948: Implement new IntensityData object with improved usability	Archived
Feature # 842: Provide IntensityData object with helper methods to import user data	Rejected
Refactoring # 1074: Replace complex OutputData structures at low level with vector of r...	Archived

History

#1 - 09 May 2013 23:12 - wuttke

- Subject changed from OutData campaign to OutputData campaign

#2 - 10 Oct 2013 15:59 - pospelov

- Status changed from New to Backlog

#3 - 10 Oct 2013 15:59 - pospelov

- Tracker changed from Bug to Feature

#4 - 11 May 2015 17:22 - herck

- Subject changed from OutputData campaign to IntensityData campaign

- Description updated

#5 - 11 May 2015 17:31 - herck

- Status changed from Backlog to Sprint

- Target version set to Sprint 27

#6 - 26 May 2015 10:38 - herck

- Status changed from Sprint to Backlog

#7 - 26 May 2015 10:38 - herck

- Target version deleted (Sprint 27)

#8 - 02 Nov 2015 22:58 - pospelov

- Status changed from Backlog to Rejected

Campaign is over, multiple children resolved already.
