

BornAgain - Feature #610

Feature # 604 (Archived): Implement QStandardItemModel hierarchy

Generate QStandardItem objects from the domain objects

14 Feb 2014 13:40 - herck

Status:	Resolved	Start date:	14 Feb 2014
Priority:	Normal	Due date:	
Assignee:	pospelov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Sprint 21		
Description			
Provide translation from domain objects (ISample, Beam, ...) into QStandardItem objects (respecting the hierarchy)			

History

#1 - 11 Apr 2014 13:49 - pospelov

- Status changed from Sprint to Backlog
- Target version deleted (Sprint 20)

#2 - 30 Apr 2014 11:40 - pospelov

- Status changed from Backlog to Sprint
- Assignee set to pospelov
- Target version set to Sprint 21

#3 - 06 May 2014 11:46 - pospelov

- Status changed from Sprint to Resolved

Done for ISample+materials, but without Simulation/Beam.
