AwStats I know, but there is another solution which requires very little efforts - Google Analytics.

If you have Google mail you can go into [www.google.com/analytics](http://www.google.com/analytics), register there your web address, get from there little code snipped which you inject into your Drupal theme, and then Google collects and analyze all relevant information for you.

#### #2 - 18 Dec 2014 16:02 - pospelov

- Status changed from Backlog to Sprint
- Assignee set to pospelov
- Target version set to Sprint 25

#### #3 - 18 Dec 2014 16:03 - pospelov

- Status changed from Sprint to Resolved

Google analytics is working, for AWStat we can see later. Declaring as resolved

#### #4 - 30 Jan 2015 13:31 - herck

- Status changed from Resolved to Archived
