Category:		Estimated time:	0.00 hour
Target version:	Sprint 28		
Description			
To make GUI independent from any local python installations.			
The question to answer, how our python27.dll will interact with system one, when user will use BornAgain from python.			

History

#1 - 13 Nov 2014 11:35 - pospelov

- Description updated
- Status changed from New to Sprint
- Target version set to Sprint 25

#2 - 09 Jan 2015 16:25 - pospelov

- Status changed from Sprint to Backlog

This will be certainly later, simultaneously with the build on MSVC2014

#3 - 09 Jan 2015 16:25 - pospelov

- Target version deleted (Sprint 25)

#4 - 17 Feb 2015 09:26 - wuttke

- Parent task set to #418

#5 - 16 Jul 2015 10:48 - pospelov

- Status changed from Backlog to Sprint
- Assignee set to pospelov
- Target version set to Sprint 28

#6 - 17 Jul 2015 10:18 - pospelov

- Status changed from Sprint to Resolved

Now Python27.dll is included into Windows installer.

- No need anymore to have Python installed on the system to use BornAgain GUI
- If Python is installed, seems that everything is working (GUI is working, scripting is working, i.e. no conflict between different Python's dlls)

More testing is certainly necessary before release is like that

#7 - 31 Jul 2015 14:50 - pospelov

- Status changed from Resolved to Archived
